

BRAYDEN BURDEN

Full Stack Developer

+1 (709) 454-5027 @ brayden.burden00@gmail.com

<https://www.linkedin.com/in/brayden-burden> Corner Brook Newfoundland, Canada

EXPERIENCE

Full Stack Developer

Nexus

04/2025 - Present Remote

- Develop a smart hotel MVP, focusing on seamless user experience.
- Built frontend modules, including login, dashboard, device carousel, and profile pages.
- Learned Microsoft Blazor to create admin dashboards with analytics widgets.
- Contributed to responsive, cross-platform design decisions.

Full Stack Developer / Lead Developer

Steady Innovation Corporation

04/2024 - 03/2025 Corner Brook, Canada

- Led development of Sidekick, an AI assistant using React Native, Node.js, MySQL, AWS, RevenueCat, and OpenAI API—built end-to-end and deployed.
- Enhanced Fixden with multiple deployments and created Fixxie enabling actions via conversational AI.
- Mentored a student.

Full Stack Developer

Freelance

12/2024 - 04/2025 Remote

- Developed the initial structure of Sidekick, a mobile AI assistant using React Native, Node.js, MySQL, and OpenAI API.
- Delivered a functional MVP during final semester and early independent work, earning \$1,250.

Junior Full Stack Developer (Co-op)

Steady Innovation Corporation

01/2023 - 04/2023 Corner Brook, Canada

- Contributed to building Fixden, a contractor-homeowner marketplace, from the ground up despite limited JavaScript experience.
- Developed frontend and backend features using React, Node.js, MySQL, DynamoDB, and AWS.
- Collaborated with the team to implement features and optimize system design.

SUMMARY

Full Stack Developer with 2 years of combined professional, co-op, and freelance experience. Skilled in the MERN stack (React, Node.js, MySQL) with hands-on AWS experience (Amplify, Elastic Beanstalk, S3, DynamoDB) through deploying and managing full-stack applications. Led the development and deployment of a React Native mobile AI assistant at Steady Innovation Corporation, applying Agile methodologies, mentoring team members, and implementing subscription integration. Seeking a remote role to full-stack expertise in building scalable, high-impact software solutions.
